DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/19/2005 has been entered. Claims 1-22 are pending.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert O. Guillot on 02/14/2006.

The application has been amended as follows:

- In claim 1, line 11; --and upon said electrical leads-- has been inserted after "bias layer."
- In claim 1, line 13; "location" has been changed to --locations--.
- In claim 1, line 14; --and upon said electrical leads-- has been inserted after "bias layer."

Art Unit: 2656

- In claim 10, line 12; --and upon said electrical leads-- has been inserted after "bias layer."
- In claim 10, line 14; "location" has been changed to --locations--.
- In claim 10, line 15; --and upon said electrical leads-- has been inserted after "bias layer."
- Applicant is required to submit a set of formal drawings.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

- With regard to independent claims 1 and 10, as the closest reference on record, Gill et al (US 2004/0090718) discloses a hard disk drive including a magnetic head including a read head element and a method of fabricating, including: a pinned magnetic layer; a free magnetic layer having a central portion thereof having a free magnetization; a magnetic bias layer, including a central portion thereof that is disposed across the central portion of the free magnetic layer; the central portion of the bias layer being comprised of a material having an approximately zero magnetic moment; a pair of electrical leads and being disposed above the bias layer on opposite sides of the central portion of the bias layer; a barrier layer being disposed across the central portion of the bias layer and upon the leads; **but fails to show** that the barrier layer is not disposed between the electrical leads except in the locations of across the center portion of the bias layer and upon the electrical leads.

Art Unit: 2656

- Applicant asserts: in this invention the “bias layer central portion to prevent the diffusion of oxygen from the bias layer. The magnetic head therefore retains its desirable free magnetic layer properties during subsequent thermal cycling and other fabrication steps that are undertaken during the magnetic head fabrication” (Specification, pp. 10-11).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tianjie Chen whose telephone number is 571-272-7570. The examiner can normally be reached on 8:00-4:30, Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hoa Nguyen can be reached on 571-272-7579. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
